Frontend developer (beginner) | Software Development student

Software Development student with a strong interest in Frontend Development. I enjoy creating user-friendly and responsive websites using HTML, CSS, JavaScript, and React, looking forward on improving my skills and learning new technologies.

My goal is to gain experience and getting to work on projects that would help me become a better developer.

Experience

Restaurant Clerk, Tortas Chucky's

June 2021, December 2024.

- Several positions at multiple occasions: Waiter, Delivery Person, and Dispatcher.
- Communication Skills: Interacted with customers, restaurant staff, and drivers to ensure clear and efficient service.
- Teamwork: Worked collaboratively with colleagues to manage orders, deliveries, and customer requests.
- Problem-Solving: Found quick solutions for traffic delays, order issues, and customer concerns.
- Time Management: Organized tasks efficiently to meet deadlines and provide timely service.
- Customer Service: Maintained a friendly and professional attitude to enhance the customer experience.

Food Delivery, Tacos Toña.

January 2021, June 2021.

- Communication Skills: I talked with customers and restaurant staff to ensure good service.
- Teamwork: I worked with others to deliver food quickly and correctly.
- Problem-Solving: I found solutions to traffic, delays, and customer requests.
- Time Management: I planned deliveries to be on time.
- Customer Service: I was friendly and helpful to customers.

Academical

Centro De Enseñanza Tecnica Industrial, Software Development, Technologist Degree.

July 2021 - Currently

- Currently in my last semester. During my studies, I've learned the most important elements I can bring to a company.
- Experience programming with C++, C#, JS, Python, HTML, CSS and Arduino IDE for creating basic.

Miscellaneous and certifications

- Certificate in basic Web3 development using Internet Computer Protocol technology with Motoko language (16/12/2024).
- Participation in "Discover Data with Oracle Education Foundation", where used Oracle Analytics Cloud to analyze data about the objectives of ONU sustainable development.
