Frontend developer (beginner) | Software Development student

Software Development student with a strong interest in Frontend Development. I enjoy creating user-friendly and responsive websites using HTML, CSS, JavaScript, and React, looking forward on improving my skills and learning new technologies.

My goal is to gain experience and get to work on projects that would help me become a better developer.

Experience

Restaurant Clerk, Tortas Chucky's

June 2021, December 2024.

- **Customer service and coordination:** I took orders, answered questions, and helped solve customer issues. I made sure communication was clear between customers, staff, and drivers.
- **Delivery planning and teamwork:** I organized deliveries, handled traffic delays, and worked with my teammates to make sure orders arrived on time.
- **Problem-solving:** I found quick solutions for order mistakes, route problems, or special requests, always keeping a friendly and helpful attitude.

Internship, Ingneria Computacional

November 2025, currently.

- **Computer repair and setup:** I help fix computers by changing parts like hard drives, RAM, and power supplies. I also help set up and configure desktop and laptop computers for daily use.
- **Software and system updates:** I help install and update operating systems, drivers, and other basic programs to make sure computers work properly.
- **Hardware, network, and web support:** I work as an assistant installing security cameras, routers, switches, and other network devices. I also helped with some coding tasks for the company's landing page, following the lead developer's instructions.

Academical

Centro De Enseñanza Tecnica Industrial, Software Development, Technologist Degree.

July 2021 – July 2025

- During my studies, I've learned the most important elements I can bring to a company.
- Experience programming with C++, C#, JS, Python, HTML, CSS and Arduino IDE for creating basic.

Centro De Enseñanza Tecnica Industrial, Software Development, Engineering Degree.

August 2025 – Currently

- With the goal of improving and developing skills in my career, I am studying for a degree in software development.

Miscellaneous and certifications

- Participation in "Discover Data with Oracle Education Foundation, where Oracle Analytics Cloud is used to analyze data about the objectives of ONU sustainable development.
- Python Essentials 1, Skills I learned: best Practices in Programming, Algorithmic Thinking, Design, Develop, and Debug Scripts, Basic Python Programming, Computer Programming, Procedural Programming, Analytical Thinking, Python, Entry-level
